# KOTA PRABHU PREETHAM

+91 8688390757 Prabhukota0@gmail.com Hyderabad,Telangana

## PROFESSIONAL SUMMARY

Engineering graduate with hands-on experience in Linux, Python, AWS, and troubleshooting technical systems. Built and deployed AWS-based applications using EC2, VPC, ALB, IAM, and Linux servers, with practical experience in system configuration and debugging. Strong foundation in Python scripting, Data Structures and Algorithms, Operating Systems, and problem-solving.

## TECHNICAL SKILLS

- Programming & Scripting: Python, Bash/Shell Scripting
- Programming Fundamentals: Data Structures & Algorithms (Basics), Object-Oriented Programming (Basics)
- Cloud Platforms: Amazon Web Services (EC2, S3, VPC, IAM, RDS, ALB, Auto Scaling, CloudWatch, Lambda)
- Databases: SQL, MySQL
- Operating Systems: Linux/Unix, File Permissions, Processes, SSH, System Services, Log Analysis
- DevOps & Tools: Git, GitHub, Docker, Jenkins

## PROJECTS

### Secure Multi-AZ Web Application Deployment using AWS VPC and ALB

Technologies: AWS VPC, EC2, ALB, Auto Scaling, Linux, Bastion Host, Security Groups, NACLs

- Deployed a highly available web application architecture using public and private subnets, Bastion Host, and EC2 Auto Scaling across multiple Availability Zones.
- Configured an Application Load Balancer and Target Groups to route traffic to private EC2 instances hosting a sample web application.
- Implemented Security Groups and Network ACLs to control and restrict traffic between public, private, and Bastion subnets.
- Used Linux-based EC2 servers and SSH for server access, configuration, and application deployment.

### Linux System Monitoring & Troubleshooting Tool

Technologies: Python, Linux, Bash

- Developed a Python-based utility to monitor CPU usage, memory utilization, disk space, and running processes on Linux systems.
- Automated system checks using Python and Linux commands to identify basic resource and service-related issues.
- Implemented log-file analysis to identify errors and generate a simple system health report.
- Used Python scripting and Linux commands to automate repetitive system monitoring and troubleshooting tasks.

### Python Application CI/CD Pipeline using Jenkins

Technologies: Python, Jenkins, Git, GitHub, Docker, AWS EC2

- Built an automated CI/CD pipeline using Jenkins to build, test, and deploy a Python application.
- Integrated Jenkins with GitHub to automate pipeline execution whenever new code changes were pushed.
- Configured automated Python testing and application packaging as part of the Jenkins pipeline.
- Containerized the Python application using Docker and deployed the containerized application on an AWS EC2 instance.

## EDUCATION

**Indian Institute of Information Technology, Nagpur** — **DEC 2020 - JUN 2024**

Bachelor of Technology in Electronics and Communication Engineering — Nagpur, Maharashtra

## CERTIFICATIONS

- AWS Cloud Practitioner Certification - AWS Skill Builder
